### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 26, 2004 has been entered.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 11-14 & 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ball [U.S. Patent No. 2,463,506]. Ball (figures 1-12) teaches of a chest (10 or 13) capable of distributing food, the chest being provided with a vertical mast (17) on which supports (16) are fixed via elements (59), the mast having a longitudinal axis (see fig. 1), the chest having lifting means (disclosed as a suspension device) in the chest for moving the mast in vertical translation, and in which at least some of the supports are movable in rotation about an axis which coincides with the longitudinal axis of the mast [it is noted that the supports are positioned for rotary movement as disclosed in the specification, and that rotational movement coincides with the longitudinal axis of the mast]. The chest being suitable for maintaining a constant

Application/Control Number: 09/673,947

Page 3

Art Unit: 3637

temperature [it's completely enclosed for example] as broadly recited. The mast being adjacent to a vertical edge (fig. 1) as broadly recited. The chest including a housing (viewed as the compartment or "housing" above element 23 as depicted in fig. 1) capable of accommodating thermal blocks. The chest including a spacer (middle 61) located between two supports (16's) on the mast as broadly recited. The chest further including a retractable guide (36) for facilitating insertion of the supports as broadly recited.

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 11-13, 16 & 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bugenhagen [U.S. Patent No. 2,563,208] in view of Hoffmann et al., [U.S. Patent No. 3,531,169]. Bugenhagen (figures 1-10) teaches of a chest (1) capable of distributing food, the chest being provided with a vertical mast (3) on which supports (disclosed as shelves) are fixed via element (5), the mast having a longitudinal axis (see fig. 1), the chest having lifting means (see fig. 4) in the chest for moving the mast in vertical translation, and in which at least some of the supports are movable in rotation about an axis which coincides with the longitudinal axis of the mast [it is noted that the supports are utilized for rotary movement as disclosed in the specification, and that rotational movement coincides with the longitudinal axis of the mast]. The chest being suitable for maintaining a constant temperature [refrigerator].

Application/Control Number: 09/673,947

Art Unit: 3637

The mast being adjacent to a vertical edge (fig. 1) as broadly recited. The chest including a spacer (25 for example) located between two supports (shelves) on the mast as broadly recited. The chest further including a retractable guide (5) for facilitating insertion of the supports as broadly recited. Bugenhagen teaches applicants inventive claimed structure as disclosed above; including a lid (2) for the top of the chest, but Bugenhagen does not show the lid as being two parts which may open up to form two shelves, or show castors on the bottom of the chest. However, Hoffmann (figures 1-9) teaches of a chest (10) in an analogous art having a lid comprising two parts (25) that open up to form two horizontal shelves (fig. 2), and castors (20) on the bottom of the chest. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the chest of Bugenhagen so as to incorporate a two lid halves and castors as taught by Hoffmann because this arrangement would provide Bugenhagen with a lid that when removed would function as serving platforms on either side of the open top of the chest thereby providing an additional work surface while utilizing the chest, and the castors would provide mobility to Bugenhagen's chest so that the chest could we wheeled to desired locations without having to lift the chest.

Page 4

# Allowable Subject Matter

6. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/673,947 Page 5

Art Unit: 3637

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Lichtstern et al., describes a mobile chest with pivoting lid

halves that form horizontal shelves. Atwater describes a chest with a vertical mast

and rotating supports.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to James O. Hansen whose telephone number is 703-

305-7414. The examiner can normally be reached on Mon.-Fri. 8-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lanna Mai can be reached on 703-308-2486. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR

only. For more information about the PAIR system, see http://pair-direct.uspto.gov.

Should you have questions on access to the Private PAIR system, contact the

Electronic Business Center (EBC) at 866-217-9197 (toll-free).
